Dear Lou:

Enclosed you will find the information you seek. Although we have been quite active on behalf of the female to make transition for 11 years, we have organized a complete gender service as of this year. Able to help many, each step of the way.

Unfortunately there is little news in the phalloplasty area. The only person who has been completed and can stand up to urinate through the University of Virginia clinic has gone through 2 years and about 8 stages - and is still not complete. I am enclosing a picture of his phallus as it looks today - horrid. It was very painful from every aspect, but as he, you and I know this was experimental.

Great that you're working with Paul. I am enclosing my latest brotherhood picture, would you please give it to him.

By all means please include us in your directory. Thank you.

Warm regards,
