Abuse of Gender-Variant Children

Scientific Meeting

The Analysis of an Analyst with

GenderPatho-Philia

"an unnatural need or desire to pathologize any gender behavior which makes you uncomfortable"

The Search for Why Judith Wants to Enforce Gender Norms

Judith C, a psychiatrist in private practice, presented with complaints of an irrational fixation on other's gender displays, complicated by uncontrollable urges to police gender norms. As in advanced cases of GenderPatho-Philia, her symptomatology included an obsessional need to "fix" gender-variant children. Tonight's presentation by top psychiatrists from The Transsexual Menace will focus on the etiology, pathogenesis, and treatment of Judith C's condition, as well as her overall prognosis (which, we might add, isn't all that rosy). Refreshments and a healthy dose of gender-tolerance will be served following the presentation. (Donations to the "Save Judith C!" treatment fund are welcome.)

Did you know...

that Gender Identity Disorder (GID) is used to inflict "corrective treatment" on "sissy boys" and "butchy girls" *as young as 2 or 3 years old?*

Did you know...

the only thing "wrong" with most gender-variant children is that their parents are uncomfortable with them and their psychiatrists are fixated on "correcting" them; the problem isn't gender-variant kids, it's a gender-intolerant society.

Did you know...

Just as with the "**disease of Homosexuality**," psychiatrists are once again pathologizing sexual difference and trying to "treat" it. Don't you guys learn anything from your mistakes?

Hey Judith!

Get a Life! Better yet...

Get Your Diagnoses *Off* Our Bodies and *Off* Our Kids!!!

The Transsexual Menace: Just your average group of genderqueers with poor impulse control and *really* bad attitudes.
