Dear Dr. Brownstein

Finally got some photos that turned out. The ones you took didn't, the ones I took didn't. My sister took these.

So far everything's fine. The ~~numbness~~ ^{sensation} in my new ~~testicle~~ ^{left} scrotum is ~~going~~ ^{slowly} returning and I've begun forcing the left ^{ball} under + the right ^{one} up, trying to help stretch the left scrotum so it will hang like the right. All in due time.

~~All well concerning~~ Have been feeling ^{very} well concerning the AIDS issue, too. Still on AZT and doing aerosol pentamidine on U. C.'s experimental program.

Beginning to feel pretty horny
as my left ball heals, and I'll
have to bolster my confidence,
get past feeling like a Walking
Germ, and get my ass to the
men's Safe Sex Jack-off Clubs!
Again, all in due time.

I want to sincerely thank
you again, Doctor, for your ^{fine} work,
~~—~~ especially under these ^{last} touchy
conditions. ~~As for~~ I've been
highly recommending your surgery
to all who ask.

Warm regards
