

# Pediatricians to Intersexed\*: Drop Dead!

\*Children whose genitals are neither identifiably male or female.

**American Pediatricians cut into 5 intersexed infants every day to make their genitals cosmetically “normal.” Most will lose their genital sensation, some will later commit suicide.**

## **Did you know...**

Pediatric surgeons admit they cut off our genitals just to make them “*look better*” and not for any medical reason. Intersexed Genital Mutilation (IGM) is not medicine!

## **Did you know...**

Pediatric surgeons operate on *non-complaining intersexed children as young as 2 weeks to 2-3 years of age?* Have they ever heard of “informed consent?”

## **Did you know...**

The AAP cravenly takes no stance on the surgical removal of infants genitals simply because a clitoris is “too large” or a penis “too small,” and it is our bodies which must pay the price.

## **HEY AAP! Get Your Scalpels Off Our Bodies!!**

**We're not quiet.  
We're not well-behaved.  
And we're not going away.**

From *Hermaphrodites With Attitude*: We're here. We're queer. Stop cutting into our goddamn bodies! (415)436-0585
